MILIS[®] CLEANSING MILK
Hydrating Anti-Aging

1. **Indications:** ideal for delicately removing make-up and cleansing the face and body. Gently eliminates the dead cells and impurities responsible for dull skin. Helps maintain the hydrolipid film and improves elasticity for a brighter and more compact complexion. For a pleasant velvety sensation and comfort that won't leave skin feeling dry or greasy. Prepares the skin for the benefits of subsequent treatments. Suitable for sensitive skin.
2. **MILIS[®]** contains *Fospidina*, a complex of phospholipids extracted from soy and glucosamine. Their synergistic produces a regenerating action on cutaneous tissue since glucosamine, a precursor of hyaluronic acid, is carried by the phospholipids through to the dermis where it can act effectively.
Active ingredients:
 - **Phospholipids and Glucosamine:** improve superficial and deep hydration of the epidermis for an anti-aging action.
 - **Superoxide Dismutase:** this is an enzyme with *radical scavenger* properties that assists with the natural cell repair process and therefore improves skin elasticity.
 - **Vitamin C:** antioxidant and *radical scavenger* properties mean that Vitamin C acts preventatively on microcirculation and redness.
 - **Vitamin E:** a powerful antioxidant that protects cell membranes from attack by free radicals.
