### DERMAGENIA® EVERYDAY SMOOTHING MASK Anti-aging Regenerating Antioxidant

1. **Indications:** delicately eliminates impurities and dead cells, helping to regenerate the skin tissue and prevent skin aging. Hydrating active ingredients act at both superficial and deep layers, helping to regulate the loss of water through the skin. The antioxidant action combats free radicals, helping to maintain optimum cellular physiology. Suitable for all skin types, even the most sensitive, and for use all year round and at any age. Creamy, sensory, delicate and multi-tasking texture.
2. **Functional active ingredients:**
  - **White clay:** rich in silicon and considered the purest and most delicate clay, ideal for all skin types, even the most sensitive. Delicately eliminates impurities and dead cells from the skin, helping to regenerate the skin tissue and prevent skin aging.
  - **Low molecular weight hyaluronic acid:** acts at both superficial and deep layers thanks to its low molecular weight and better penetration capacity.
  - **Hydrolyzed yeast proteins:** encourage the synthesis of epidermic lipids and perform a beneficial action on the skin's microbiota, helping to keep the skin hydrated, to reinforce and rebalance the skin barrier and to preserve the balance of the skin's ecosystem.
  - **Marjoram extract:** a leaf extract rich in antioxidants such as polyphenols, beta-carotene (precursor of vitamin A) and tannins.
  - **Organic olive oil:** guarantees excellent deep hydration by helping to regulate transepidermal water loss. Emollient, softening, and sebo-balancing, it is rich in vitamin E, ceramides, monounsaturated fatty acids and antioxidant substances that can combat free radicals.
  - **Tamanu oil:** a natural antioxidant that fights against free radicals. Rich in linoleic acid, an essential fatty acid, with emollient and restorative properties, it improves elasticity and deeply nourishes the skin. Rich in phytosterols too, especially beta-sitosterol, which is useful for promoting cell regeneration.
