ALUSEB® Lotion
with Alukina

- 1. Indications:** a useful dermocosmetic support that counteracts the skin conditions often associated with seborrhoeic dermatitis, encouraging peeling and reducing redness and annoying itching. Easy-to-absorb combines the properties of Alukina with those of Panthenol. Panthenol is transformed into pantothenic acid, a fundamental component of Coenzyme A which plays a key role in the skin's energy metabolism. Panthenol encourages skin hydration and performs a lenitive and emollient action.
- 2. ALUSEB®** is a line of dermocosmetic products containing Alukina and created from the synergistic combination of:
 - **Potassium alum:** a salt of volcanic origin with astringent and sebostatic properties. In ancient times, it was used in Arabic and Asian countries to naturally firm the skin and to counteract skin irritations and cracking due to environmental causes such as wind, cold weather and changes in temperature.
 - **Glycyrrhetic acid:** obtained from liquorice (*Glycyrrhiza glabra*) and used in cosmetics for delicate and sensitive skin as a lenitive and emollient.
 - **Vitamin A (Retinyl palmitate):** plays an important cosmetic role in maintaining the integrity of cell membranes, stimulates the renewal of skin cells and maintains hydration for longer, a key factor in keeping skin supple.

Other important ingredients include:

- **Panthenol:** encourages skin hydration and performs a lenitive and emollient action.
- 3. Product name:** ALUSEB® Lotion
 - 4. Ingredients:** AQUA, PENTYLENE GLYCOL, PROPYLENE GLYCOL, ALCOHOL DENAT., HELIANTHUS ANNUUS SEED OIL, TOCOPHEROL, XANTHAN GUM, PARFUM, POTASSIUM ALUM, PEG-40 HYDROGENATED CASTOR OIL, PPG-26-BUTETH-26, TRIETHANOLAMINE, RETINYL PALMITATE, DISODIUM EDTA, AMMONIUM GLYCYRRHIZATE, GLYCYRRHETINIC ACID, PANTHENOL, POGOSTEMON CABLIN OIL, TERPINEOL
 - 5. Cosmetic form:** lotion
 - 6. Capacity:** flacon 75ml
- How to use:** apply morning and evening to affected areas and as needed in cases of severe discomfort. Massage gently until completely absorbed. Contains vitamin A. Please consider your daily intake before use.
- 7. Warnings:** ALUSEB® Lotion has been dermatologically tested on sensitive skin. Use not recommended in case of allergy to any of the components.
 - 8. PaO (Period after Opening):** 12 months
 - 9. Storage:** the product should be stored at normal ambient conditions (in a dry place and at room temperature) and protected from light.
 - 10. Business name and address:** SKINIUS S.r.l. – Via Durini 14 – 20122 Milan Italy
